

Copilot for Microsoft 365

Harness the power of next-generation AI in your everyday work

Introducing Copilot for Microsoft 365

Generative artificial intelligence (AI) enables extraordinary, new ways of working to enhance employee experience and boost productivity. With NTT DATA and Microsoft, you can transform your workplace by adopting Copilot for Microsoft 365 services.

Combining the power of large language models (LLMs) and the Microsoft 365 ecosystem, Copilot is a powerful everyday AI tool that provides seamless workplace collaboration and communication techniques.

We are proud to be one of the first selected Microsoft partners bringing the power of next-generation AI to work. Our solutions and services are designed to help you get the most out of copilot capabilities and support your workforce in harnessing this powerful productivity tool.

Modern Work and Copilot Engagement Program

Generative AI is transforming Modern Work. Are you modernizing your communications whilst leveraging generative AI?

Together with Microsoft, we've developed this unique program to help you enable and trial cloud calling, user numbers, service numbers and advanced use cases whilst incorporating Copilot for Microsoft 365 capabilities.

What you get:

- Trial calling experiences with an understanding of how to incorporate upcoming Copilot capabilities.
- Users enabled with cloud calling, user numbers, and advanced use cases to replace your existing features and functionalities.
- Service numbers set up with Auto Attendant and Call Queues configured.
- Alignment with Microsoft around Copilot enablement steps and access to future features.
- Fully funded by Microsoft for eligible customers.

Modern Work

Microsoft 365 Copilot 3 Week Advisory Workshop

We guide enterprises in exploring generative AI's potential in the digital workplace. We evaluate their readiness for Microsoft 365 Copilot, provide recommendations, and deliver an organization readiness report, use cases, roadmap, and recommendations for integrating it into their existing Microsoft productivity suite management.

Unleash the full potential of everyday AI to enhance collaboration, boost productivity and elevate the employee experience.

Cloud Voice Readiness Assessment Microsoft 365 Copilot Calling & Meetings Workshop

Gain a thorough understanding of how Copilot's generative AI capabilities can be leveraged with calling and meeting solutions to improve your business outcomes.

We will assess your organization's processes, demonstrate use cases and scenarios, and provide customized, actionable recommendations you can follow.

Topics covered include:

- Overview of Copilot (what it is used for, how does it work)
- Data sovereignty of Copilot (what it can and cannot access)
- Copilot in future Calling and Meetings (enabling in Calling and Meetings mode)
- Prompt engineering for Copilot (how to ask questions to get the best outputs)
- Pre-requisites and setups
- Extensibility of Copilot, including integration to other apps and APIs

EX Managed Services Essentials

Leverage NTT DATA as your single point of contact and receive accelerated incident resolution with carriers and UC platform vendors from NTT DATA's expert L1, L2, and L3 engineers.

We'll remotely support your IT teams with troubleshooting, triage and escalation of incidents relating to Copilot for Microsoft Teams.

EX Managed Services Premium

Accelerate growth and focus on your core business initiatives by offloading the day-to-day management and operation of your unified communications and productivity estate.

NTT DATA delivers fully managed services across multivendor cloud and hybrid environments with SLA-backed operations, proactive monitoring, reporting, and built-in automation

Why NTT DATA is the ideal Microsoft partner for your business
