

How NTT DATA can help you

As a leading global IT innovator of business and technology services, we enable you to adapt and transform your business, preparing for lasting, sustainable success.

Our offering includes business and technology consulting, data and artificial intelligence (AI), and industry solutions. As a world leader in digital and AI infrastructure, we help to develop, implement and manage our clients' applications, infrastructure and connectivity.

Together, we achieve the impossible

Our tailored, consultative approach addresses clients' priorities across all major industries. At our core, we champion teamwork, supporting startups, engaging with academics, constructing innovation labs and upskilling our people so that you can experience the power of collaboration firsthand.

Consulting

From understanding the potential of quantum computing for improving disease detection, to exploring the capabilities of digital twins in robotics or integrating edge computing at airports to improve connectivity, we deliver tailored, practical solutions. Our blend of consulting and industry expertise, combined with innovative thinking, helps you to navigate the possibilities of technologies that can transform your business and disrupt industries for good.

Assets

Whether you're modernizing your ecommerce platform or constructing a new digital foundation to scale your business, experience matters. NTT DATA's AI-powered platforms will transform your network and prepare your business for the future. From apps modernization to cloud migration, we have the right mix of skills and resources to help you further improve business efficiencies and accelerate value creation.

Responsible design

In today's digital society, you need a technology partner that understands the importance of responsible design – a practice that's incorporated across our portfolio. We have helped clients to keep autonomous vehicles safe from hackers, protect workforce identity and offer differentiated customer experiences through AI-driven chatbots we've created. Our global experts are on hand to help you find the right solution that supports sustainable, scalable and ethical growth.

How we support you: Optimize. Transform. Innovate.

Optimize

Improve technology and business performance and efficiencies while reducing costs and lowering carbon emissions.

Transform

Use an outcome-driven approach to overcome technology and transformation debt.

Innovate

Gain competitive advantage, accelerated by AI capabilities, with built in security and sustainability.

A sustainable future is shaped by what we do today

We recognize the importance of embedding sustainability into the fabric of our company while using technology to create a more affluent and harmonious society. It's why we rank in the top 1% of IT service providers featured in the S&P Global Sustainability Rating, 2024.

The NTT DATA sustainability strategy is based on three pillars, each with a unique objective that aligns to our corporate sustainability goals:

Prosperity Positive

Transform businesses and society for successful growth with 100% sustainable services and solutions involving our end-to-end value chain.

Planet Positive

Lead by example to disrupt industries for good with innovative services and solutions to regenerate our planet.

People Positive

Shape a better world for all, applying our digital capabilities to improve livelihoods and contribute to a diverse, equitable and inclusive society.

“ We’re the chosen technology partner for
